SKILLS

JavaScript • React js • React Router Dom • TailWind CSS • HTML • CSS • Node js
Express js • MonogoDB • MySQL • GitHub • Redux Toolkit

PROJECTS

NetFlix-Gpt

Developed a secure and efficient movie and TV show browsing application, implementing Firebase authentication for user sign-in/sign-up, ensuring protected routes accessible only to authenticated users. Integrated real-time search functionality with multi-language support, utilizing memoization for optimal performance in fetching and displaying content from the TMDB API.

Key features:

- Robust Authentication System for secure Login/Sign-up using Google Firebase.
- Intuitive Sign In/Sign Up Form for hassle-free access.
- Smooth redirection to the Browse Page for uninterrupted exploration of movie content.
- Dynamic Header for an immersive browsing experience.

Engaging the Main Movie Display and Background Trailers for an enticing visual experience using TMDB API's.
